

Workplace Health and Safety Manual Order Form

In putting this manual together we have tried to keep much of the technical information to a minimum to enable you to implement user friendly Workplace Health and Safety Policies and Procedures into your organisation.

The primary aim of this manual is to give you assistance in becoming aware of your obligations under the Current Qld Workplace Health and Safety Acts, Regulations. Other benefits of this manual encompass a range of general awareness related matters which can assist you in providing a greater duty of care as employers.

We have also included some user friendly checklists for auditing purposes.

As always if you are not sure about any matter relating to Workplace Health and Safety please contact us on 3852 5177.
